LTC CABLE TUBE

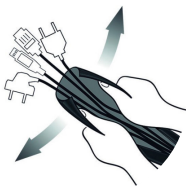

WE THINK OUR AESTHETIC, CUSTOMISABLE CABLE TUBE IS A THING OF BEAUTY.

The flexible and self-sealing cable hose is ideal for bundling, routing and arranging cables.

SELF-SEALING

The cable hose easily wraps around the cables you want to bundle. No tools are required and devices are not clogged during the process.

SHORTEN TO ANY LENGTH

The robust fabric of the cable hose can be easily shortened to any desired length with scissors.

FLEXIBLE

The LTC CABLE TUBE is extremely flexible. It can also be easily installed in corners, curves and sharp angles, without wrinkling.

• *Other benefits* •

variable diameter

The diameter of the LTC CABLE TUBE automatically adjusts to the thickness of the cable strand.

cut-resistant

You can seal small fringes that can appear during shortening with a lighter. But it's not necessary: the material of the LTC CABLE TUBE effectively holds its form.

customisable

You can use or route cables anywhere, according to your needs. A simple cut made about halfway up the cable is sufficient.

heat & cold resistant

The odourless LTC CABLE TUBE is extremely durable and withstands temperatures from - 50 ° C to 150 ° C. This makes it ideal for outdoor use or extreme locations.

more safety for all

The LTC CABLE TUBE effectively protects children or pets from accidents or mishaps.

dust & dirt resistant, washable

The hose offers optimal protection from dust and grease. It's dust-repellent and can be easily vacuumed or wiped clean with a cloth. When needed, it can be washed at up to 60 ° C.

FOR ALL THOSE WHO CAN'T GET ENOUGH, our LTC CABLE TUBE is also available in a 25 m format.

Name	Article No.	Colour	UVP
LTC CABLE TUBE 2 m	LTC 5110	black ●	24,99 Euro
